## Lasers

1. Lasers can be used in science fair projects done at home or school only if:
  - The beam is protected, so that it can never enter the eye of any observer.
  - All appropriate safety precautions and eye protection are in place.
  - All legal, regulatory and industry standard restrictions are observed.
  - There is an adult supervisor who has sufficient knowledge to enforce safe procedures at all times.
2. Lasers cannot be brought to the science fair unless the conditions in 1 are in place.
3. Lasers may not be used as pointers at the science fair.
4. Both students and their supervisors must be familiar with this discussion on the [Safe Use of Lasers](#).
